<p>Network Name URL</p>	 <p>Higher Education Research and Development Society of Australasia WWW.herdsa.org.au</p>
<p>Mission / Aim / Focus</p>	<p>The Higher Education Research and Development Society of Australasia (HERDSA) is a scholarly society for people committed to the advancement of higher and tertiary education. It was established in 1972 to promote the development of higher education policy, practice and the study of teaching and learning. HERDSA encourages and disseminates research on teaching and learning and higher education development. It also works to build strong academic communities.</p> <p>HERDSA works to</p> <ul style="list-style-type: none"> • advance educational policy and practice in the higher education and tertiary sector • facilitate and promote the enhancement of teaching and learning • encourage and disseminate research on higher education and tertiary teaching, learning, development, research, leadership and policy matters • recognise and reward outstanding contributions to higher and tertiary education • encourage collaboration and the development of professional communities in higher and tertiary education and • assist its members in their ongoing professional development. <p>Membership includes disciplinary academics, academic developers, professional staff including language and learning specialists, educational technology practitioners, educational researchers, students and administrators.</p> <p>Most members reside in Australia or New Zealand. Membership fluctuates between 700 and 900 members.</p>
<p>Brief History</p>	<p>HERDSA was established in 1972 by a few interested academics. Branches were established in the 80's to promote local activities in teaching and learning and encourage more academics to join HERDSA. HERDSA News (now HERDSA Connect) began publication early in the life of the society as a vehicle for sharing news with members (this was electronic communication!) and it also published short articles on teaching and learning written in a journalistic style.</p> <p>The HERDSA journal <i>Higher Education Research and Development</i> (HERD) was launched in 1981. Initially HERD was produced in-house, first in Sydney then in Brisbane but it is now published by Taylor & Francis and has become a respected international journal.</p>

	<p>At about the same time the Green Guides began publication to provide academics with short, practical help on various aspects of teaching and learning. Gold Guides soon followed. The second Green Guide <i>Up the Publication Road</i> by Royce Sadler is in its 3rd edition has been one of the most successful. The Green and Gold Guides were combined in the HERDSA Guides Series in about 2004.</p> <p>The HERDSA Fellowship Scheme was established in 2002 with a small number of academics being awarded their Fellowships each year.</p> <p>Conferences have been held every year since 1975.</p> <p>HERDSA continues to evolve with new initiatives and projects and changes to the administrative structure.</p>
